Election / Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I.*** Claims ***1-4, 13-32, and 34-36***, drawn to ***a method for controlling the number of cylinder strokes of an internal combustion engine***, classified in class ***123***, subclass ***64***.
- II.*** Claims ***5-12, and 33***, drawn to ***a method for controlling the number of cylinder valves in a internal combustion engine***, classified in class ***123***, subclass ***90.15***.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01. In the instant case, the different inventions have different modes of operation. Specifically, claims 5-12, and 33 require the steps of operating at least a cylinder with a first number of valves in a cycle of said cylinder; and operating said cylinder with a second number of valves in a cycle of said cylinder. . . .

Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 3748

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
